PROFESSIONAL SUMMARY

Backend-focused Full-Stack Developer skilled in **Java**, **Spring Boot**, and **React.js**, with strong experience in RESTful API development, database design, and scalable system architecture. Passionate about building secure, high-performance applications and continuously learning new technologies.

SKILLS

- Spring Boot • Java • Microservices • Hibernate • Spring Data JPA • Spring Security • Spring AI • HTML • CSS
- React.js • MySQL • Git • CI/CD • Kubernetes • Redis • MongoDB • PostgreSQL • REST APIs • Docker
- Multi-threading • Data Structures and Algorithms • OOP (Object-Oriented Programming)

WORK EXPERIENCE

Vaultofcodes

📅 November 2025 – January 2026

Java Intern

📍 Delhi, India

- Designed and developed scalable backend applications using **Java** and **Spring Boot**, implementing clean architecture and best practices.
- Built and exposed **RESTful APIs** to handle core business logic, request validation, and data processing.
- Tested APIs using **Postman** and followed proper HTTP status codes and REST standards.

PERSONAL PROJECTS

Zap URL - Scalable URL Shortener

🔗 GitHub Link

- Engineered a scalable URL shortener using **Spring Boot**, PostgreSQL, Redis, and Nginx, capable of handling 1,000+ requests.
- Integrated **Redis caching** to reduce database queries by 70%, improving response time by 50%.
- Enforced **rate limiting** with IP-based throttling (10 requests/min per user) to prevent abuse and ensure fair usage.
- Deployed with **Docker** and **Nginx-based** load balancing, enabling seamless performance across 10+ concurrent instances.
- **Dockerized microservices** architecture to support auto-scaling and high availability under high traffic loads.

Cloud Share: Full-Stack File Sharing App

🔗 GitHub Link

- Built a file sharing app with **React**, **Spring Boot**, **Spring Security**, **MongoDB**, and **Clerk Authentication**.
- Designed and implemented **RESTful APIs** for user authentication, file upload/download, access control, and sharing permissions.
- Developed a responsive and user-friendly UI, enhancing recruiter and applicant engagement and improving platform adoption by 40%.

AI Help Desk Ticket Management System

🔗 GitHub

Link

- Built an AI-powered Help Desk Ticket Management System using Spring Boot, handling issue reporting, ticket tracking, and status management.
- Developed REST APIs for ticket creation, updates, and duplicate detection, following a clean layered architecture for scalability and maintainability.

EDUCATION

Jagan Institute of Management Studies (JIMS) Bachelor of Computer Applications (BCA)

📅 August 2022 – July 2025

8.4 CGPA

Indira Gandhi National Open University (IGNOU) Master of Computer Applications (MCA)

📅 August 2025 – Present

ACHIEVEMENTS

- Solved over 300+ programming questions on coding platforms, demonstrating dedication to improving programming skills.
